Dear Mr.

Your letter of 5 February 1951 addressed to the President regarding the article in the American Legion Magazine shows that you have & keen understanding of items which affect our national security. That article, like all such pieces prepared for reblie consumption, tends to exaggerate and magnify what it covers, and speaks shout the past as if it were the present.

you will resultly Because of year training ... appreciate that we exact quote facts and figures which are shielded by security. However, you will be glad to know officially from me that enopoporation between intelligement agencies of our Government and between us and foreign friendly Governments has never been better than it is now, and we are stressing continual improvement to achieve the confidence which, you well state, must exist.

Very sinearely yours,

Assistant to the Director
